Suggested reviewers — Scientific Reports submission

Five experts in prediction-model calibration, shrinkage methodology, and cross-database ICU validation, matched to the manuscript topic; none has co-authored with the authors, is affiliated with our institutions, or took part in the study. Emails are as published and should be re-verified on the day of submission.

#	Reviewer	Affiliation / Email	Relevance
1	Maarten van Smeden	UMC Utrecht, Julius Center M.vanSmeden@umcutrecht.nl	sample-size methods (pmsampsize); BMC Med 2023 model-validity programme
2	Erik W. van Zwet	Leiden UMC, Biomedical Data Sciences E.W.van_Zwet@lumc.nl	statistical foundations of shrinkage (Stat Med 2021)
3	Mark A. van de Wiel	Amsterdam UMC, Epidemiology & Data Science mark.vdwiel@amsterdamumc.nl	"Think before you shrink", Stat Methods Med Res 2025
4	Ryohei Yamamoto	MIT IMES / Fukushima Medical University Hospital ryoheiyamamoto11@gmail.com	MIMIC-IV vs eICU-CRD external validation, calibration transferability (medRxiv 2026)
5	Gary S. Collins	University of Birmingham (ex-Oxford EQUATOR) g.s.collins@bham.ac.uk	TRIPOD+AI lead author; prediction-model reporting standards

Backups (if a suggested reviewer is unavailable): Ben Van Calster (KU Leuven, calibration paradoxes/ICI); Dan Wang (Research Square 2026, MIMIC-IV+eICU-CRD liver model, high responsiveness, email unverified); Jianyuan Liu / Gang Liu (Scientific Reports 2024, MIMIC-IV to eICU-CRD cannulation model — emails via the paper's correspondence page). No reviewers are excluded. Conflict note: none of the suggested reviewers has co-authored with the authors, is affiliated with the authors' institutions, or was involved in the design, analysis, or interpretation of this study.
